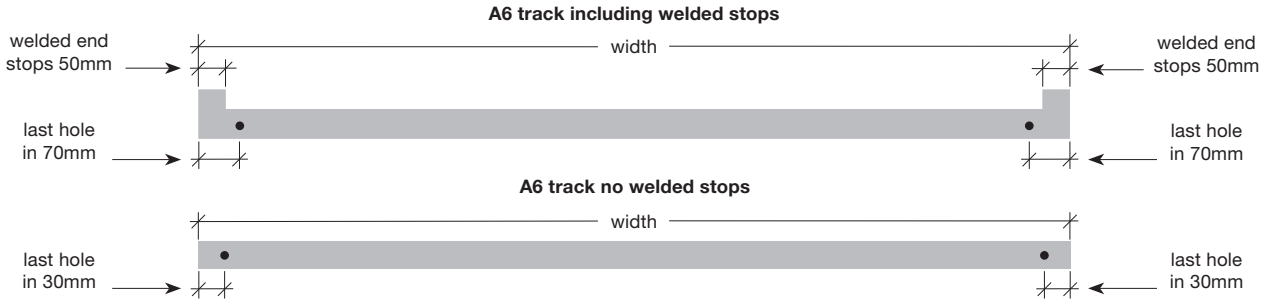
Standard fixing holes

First hole as shown below and balance approx. 650mm centres (equal spacing)



NOTE: Chrome tracks may have a slight discolouration around some fixing holes as they are used to attach the electro plating connection, this discolouration is unavoidable and not a defect.

Track – length and hole position specification

Track #	Overall width (refer above)	STD 650 spacing (Y/N)	From LH or RH end	Distance from end of track to centre of each hole (refer to diagram below)							
				1	2	3	4	5	6	7	8
1											
2											
3											
4											
5											
6											

NOTE: Zinc and powder-coat tracks longer than 6000mm will contain a splice joint. Chrome tracks longer than 2500mm will be spliced.

Track finish

- [ ] Zinc
- [ ] Brushed satin chrome
- [ ] Chrome
- [ ] Custom powder-coat
