

# S2

Insect screen for  
doors & windows

centor®

---

*Enjoy fresh air, sunlight  
and uninterrupted views –  
without insects!*

**Connect with the beauty of your garden while  
keeping unwanted pests outside thanks to Centor's  
latest screening system.**

Based on Centor's award-winning screening technology, the  
S2 Stand-alone Screen invites fresh air and sunlight into your home.  
Retracting horizontally into its frame when not in use, the S2 Screen  
ensures views remain uninterrupted whether they are open or closed!

S2 can be paired neatly with doors or windows up to 3150mm high  
and 2600mm wide.

Keep your home insect free without the need to reach for chemicals and sprays

Enjoy uninterrupted views with retractable screens that are perfectly flat

With the touch of a fingertip your youngest family members can move the screens aside

Removable covers make cleaning simple so your screens continue to work like new

---

## Simple to use

Centor's 68-year history of engineering excellence is clear to see and feel! While robust, the S2 Screen operates smoothly from any height on the stile with one hand so even the youngest members of your family can use them. When opened, the screen stays in any position without snapping shut, allowing for an easy transition from inside to out.

Should the screen mesh blow out of the top or bottom track, it will feed back onto the roll the next time it is retracted.

## Considered design

The S2 Screen can be paired alongside French or Sliding doors and with many styles of windows on the inside or the outside of the opening. Sill drainage holes are provided for systems positioned on the outside to allow water to flow out of the door drainage.

### Internal installation

### External installation

## Materials and finishes

The durable aluminium frame is available as standard in natural anodised or pearl white and matt black powder-coat, while custom colours are available on request.

The charcoal insect mesh is made from hard-wearing polyester/PVC and is available in Standard weave (for flies, moths and other pests) or Tight weave (for midges and tiny insects).

---

## Product detail

Thanks to its compact design S2 is easily paired with a new door, either during a renovation or new build, or can be retrofitted to an existing door.

Single screen	
Frame height	700 - 3150mm
Frame width	640 - 1300mm

  

Double screen	
Frame height	700 - 3150mm
Frame width	1200 - 2600mm
