

S2 Screening System

The Centor S2 Insect Screen offers insect protection, fresh air, breezes and uninterrupted views for smaller openings. Like all Centor screening systems, there are no pleats or fixed panels to interrupt the view. The S2 Insect Screen can be paired with all new and existing doors and windows in a renovation or new build.

S2 features

- Pair with smaller doors or windows, new or existing.
- Operates from any height with one hand so the youngest of family members can operate the screen.
- When not in use, the screen retracts discreetly into the frame removing visual distractions to the view outside whilst also protecting it from damage, dust or dirt. This is especially important for a seasonally used product.
- Centor's unique load balancing technology allows the screen to glide smoothly across the whole door opening to effortlessly stop at any desired position.
- The screen is fully retained within the frame on all sides to allow total control of insects.
- Can be mounted on the inside or outside – drainage holes are added to the sill for externally mounted systems.
- Compact design – low-profile sill, just 19mm high.
- Covers are quick and easy to remove to make servicing trouble free.
- Backed by a 5-year limited warranty.

Frame size

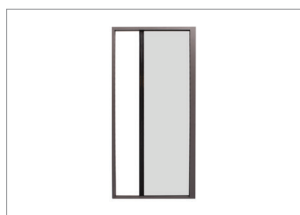

Suited for smaller openings, the S2 Screening System can go up to 3150mm high and 2600mm wide.

Frame height	700 – 3150mm
Frame width – single	640 – 1300mm
Frame width – double	1200 – 2600mm

Configurations

The S2 Screen is perfect for smaller openings. It can be fitted to the inside or outside of the opening, so you can maximise inside-outside living to its full potential.

The screen is available to two configurations;

Single

A single screen that extends from either side of the frame and covers the full width of the opening, up to 1300mm wide.

Double

Two screens meeting in the middle up of the opening up to 2600mm wide.

Aluminium frame

S4 is constructed from durable aluminium. Select from one of our popular colours below, one of the many other Centor standard colours available by visiting centor.com/screens or by specifying your own custom powder-coat colour to match existing doors and windows.

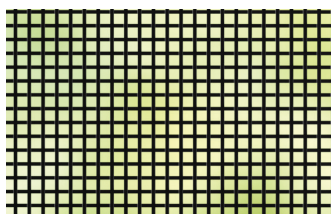

Matt Black

Pearl White Gloss

Natural anodised

Insect screens

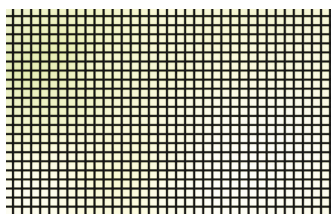

Screen mesh is available in two different weave styles with no pleats or sliding panels to detract from the view:

Standard weave

Keeps insects like moths, flies and mosquitoes outside, while standing the test of time with a durable polyester/PVC mesh construction.

Openness: 46%

Tight weave

Made from the same durable material as our standard weave but features a smaller aperture to protect homeowners against tiny insects like midges.

Openness: 37%
