

S4 wood veneer

Frame and jamb dimensions

The S4 wood veneer is only available when the screen is fitted on the inside of the door or window.

Overall frame width

The overall frame width specified in CPS is the frame width of the screen that is being ordered. It is not necessary to make any allowances for the wood.

Jamb width

The jamb dimensions vary with the number of wood veneer faces. Consequently, the clear opening needs to be calculated for each option.

Option	Overall frame width (OFW)	Jamb width	Jamb depth	
No face	As specified	105mm	90mm	
One face	As specified	108mm	93mm	
Two face	As specified	111mm	93mm	
Three face	As specified	111mm	96mm	

Overall frame height

The overall frame height specified in CPS is the frame height of the screen that is being ordered. The wood veneer options do not change the frame height. The overall frame height is the same for all options.

S4 Corner wood veneer

Frame and jamb dimensions

The S4 Corner wood veneer is only available when the screen is fitted on the inside of the door or window.

Overall frame width

The overall frame width specified in CPS is the frame width of the screen that is being ordered. It is not necessary to make any allowances for the wood.

Jamb width

The jamb dimensions vary with the number of wood veneer faces.
