

S2 retractable **INSECT SCREEN**

The S2 Screen allows homeowners with smaller openings to enjoy the luxury of inside-outside living, insect protection, fresh air, breezes and uninterrupted views. Designed to fit nearly any door — folding, french or sliding — S2 delivers unparalleled engineering.

Operating with just a fingertip, Centor's unique load balancing technology allows screens to glide smoothly across the entire opening and effortlessly stop at any desired position.

When not in use, the screen retracts discreetly into the frame, removing visual distractions to the view outside while also protecting it from damage, dust or dirt.

Retractable insect screens for smaller door openings

centor®

Finger-tip operation

Engineered to glide
from any height

Unobtrusive

Screens are there when
needed & hidden when not

Made to order

Custom-made to your
specific requirements

Reduce cooling needs

Screens allow breezes

TECHNICAL BENEFITS

- Pair with smaller doors or windows, new or existing.
- Operates from any height with one hand so the youngest of family members can operate the screen.
- The screen is fully retained within the frame on all sides to allow total control of insects.
- S2 can be mounted on the inside or outside – drainage holes are added to the sill for externally mounted systems.
- Compact design – low-profile sill, just 19mm or 25mm high.
- Covers are quick and easy to remove to make servicing trouble free.

SCREEN CONFIGURATIONS

Single

A single screen that extends from one side of the frame and covers the full width of the opening, up to 2070mm wide¹.

Double

Two screens meeting in the middle of the opening up to 4000mm wide¹.

INSECT SCREENS

Insect mesh is available in two different weave styles to suit varying environmental requirements.

Standard weave

Keeps insects like moths, flies & mosquitoes outside.

Openness: 46%

Tight weave

Protect interiors against tiny insects like midges.

Openness: 37%

FRAME COLOURS

S2 is constructed from durable aluminium. The frame can be powder-coated in one of our popular colours (centor.com/screens) or customised to colour match existing doors and windows³.

Any colour

Perfect for retro-fit or new build, S2's 25mm sill height allows easy alignment with the door sill level

Spanning up to 4m wide, S2 can be paired with most popular XO sliding and French doors

S2's slim frame delivers clean, unobtrusive lines and uninterrupted views

With the same cable system as S4, existing installers can fit both screen systems with ease.

SIZE CONFIGURATIONS

With its slimline frame, S2 is specially designed for smaller openings.
Pair with XO sliding, French or folding doors up to the following sizes:

max frame width				
sill type	frame height	double	single 70mm jamb	single 25mm jamb
19mm sill	up to 3200mm	2550mm	1345mm	1300mm
25mm sill	up to 4000mm	1900mm	1020mm	975mm
	up to 3700mm	2550mm	1345mm	1300mm
	up to 3200mm	4000mm	2070mm	2025mm

S2's maximum dimensions are affected by total fabric weight and screen tension. To ensure the product operates well, when the screen is wider the maximum height is reduced, and when the screen is taller the maximum width is reduced.

Complementing systems

S4 Corner Screen

Insect screens &/or shades for post-less doors or windows
