

S5 SCREEN AND BLIND SYSTEM

Screen and blind for timber windows

centor®

SIMPLY ROLLED AWAY WHEN NOT NEEDED

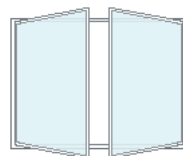

Designed for timber windows up to 2400mm wide by 1800mm high, Centor's new S5 Screen is a vertically retractable, chain-operated screen or blind that can be easily controlled with one hand.

For use with windows

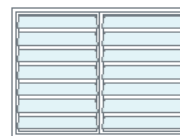

S5 can be paired alongside many window types.

The retractable screen or blind is simply rolled away when not needed. This makes it perfect for use on a window with a servery between the kitchen and an outdoor entertaining area. It also allows for windows to be cleaned easily.

S5 Specifications		
	frame height (min - max)	frame width (min - max)
insect screen	300 - 1800mm	500 - 2400mm
sun filter blind	300 - 1800mm	500 - 2400mm
blockout blind	300 - 1500mm	500 - 1800mm

ORDERING S5

S5 is ordered as a kit from Centor in selected heights and widths, ready to be cut to size.

As with all windows and doors handing is expressed when viewed from the outside, so in a left kit the operating cord is on the left when viewed from outside.

NOTE: A LEFT HAND kit when viewed from INSIDE the building would have the cord on the right hand side.

EASY ASSEMBLY AND INSTALLATION

S5 can be either fully assembled and fitted to windows in your factory or assembled and fitted on site. In either scenario installation couldn't be easier using the comprehensive instructions provided.

WARRANTY

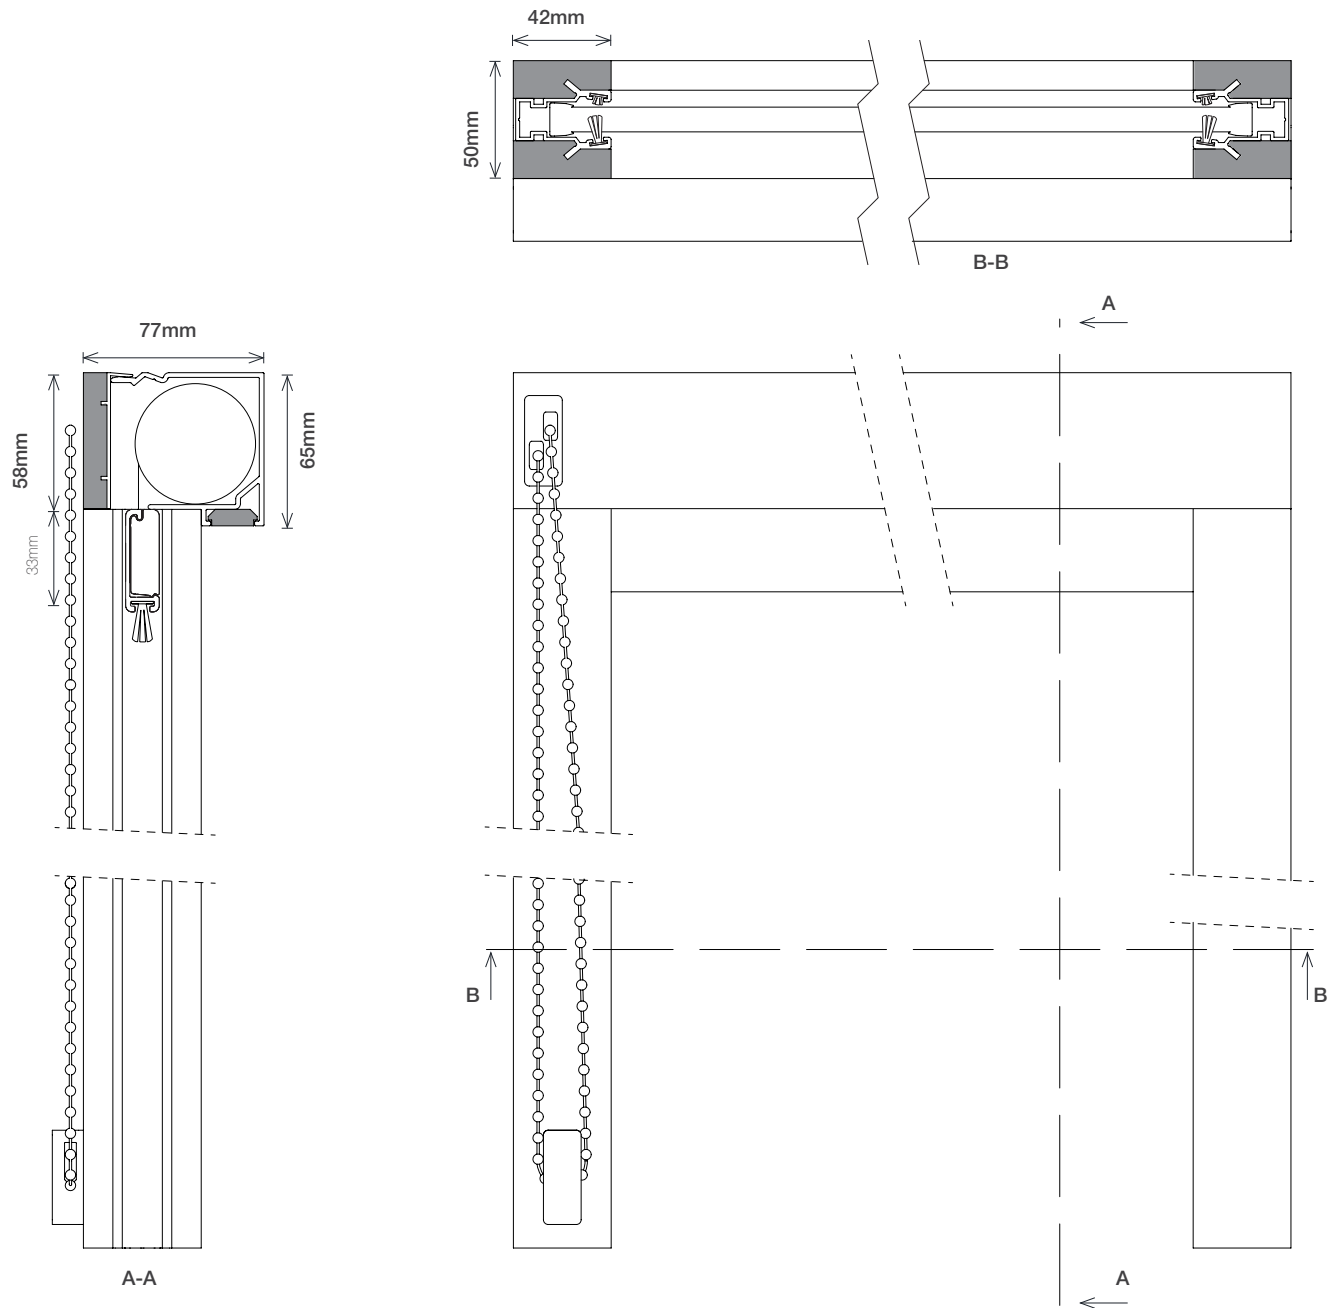

Centor offers a 5-year warranty on its S5 Screen.

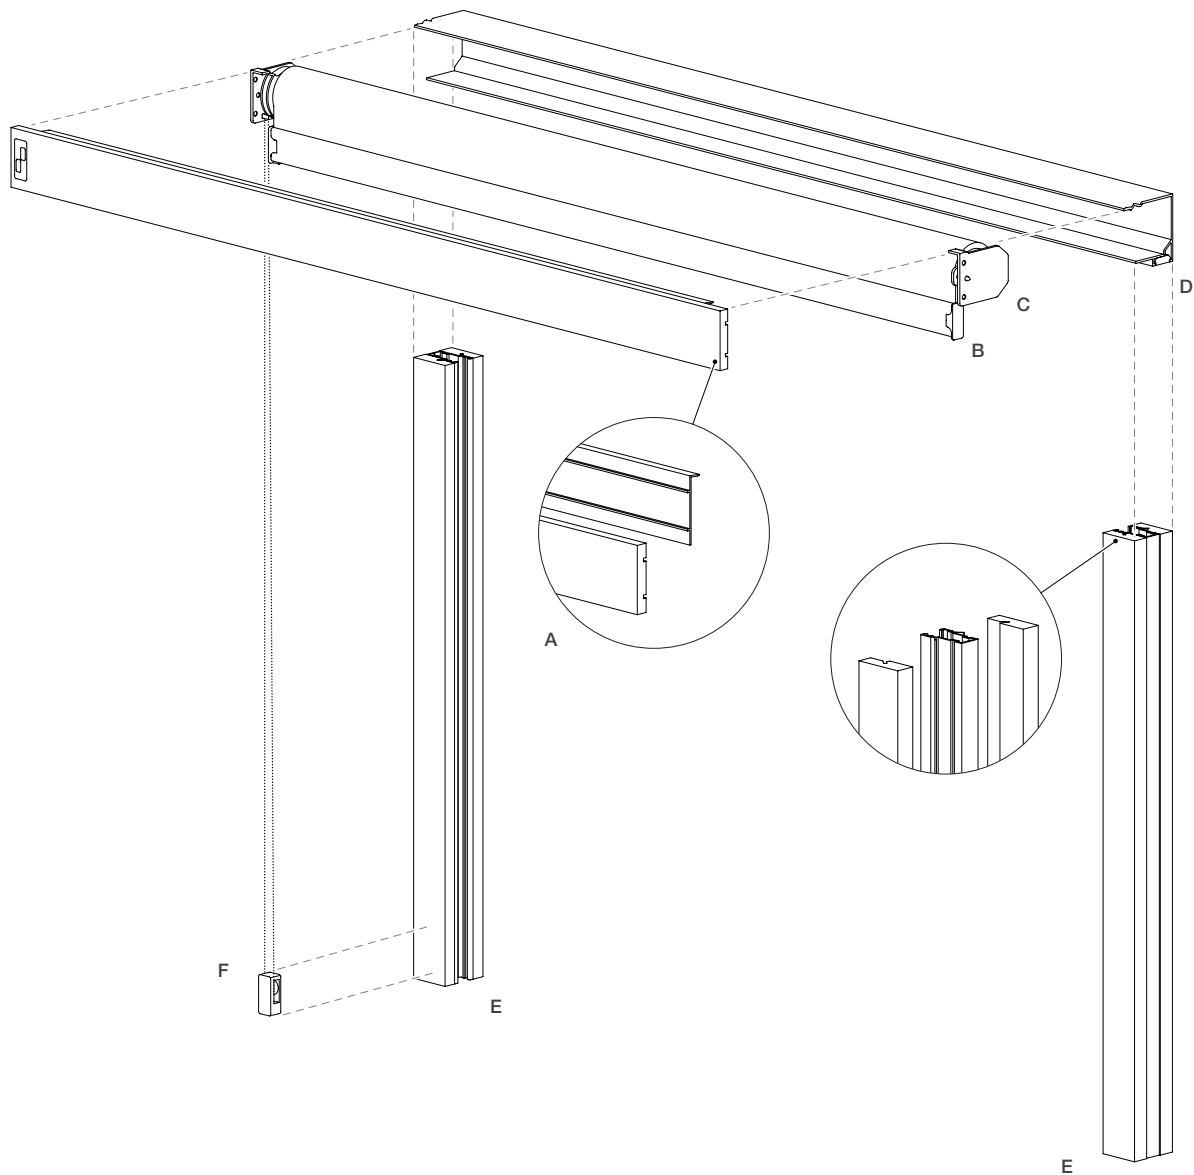

S5 PRODUCT DETAILS

Downloadable DXF or DWG files ready for use in your own documentation are a convenient resource for architects and specifiers wishing to use Centor systems.

S5 DXF or DWG files can be downloaded from centor.com
