

S2

Insect screen for
doors & windows

centor®

Enjoy fresh air, sunlight and views – without insects!

Connect with the beauty of your garden while keeping unwanted pests outside thanks to Centor's latest screening system.

Based on Centor's award-winning technology, the S2 Screen invites fresh air and sunlight into your home. Retracting horizontally into its frame when not in use, the Centor S2 ensures views remain uninterrupted whether they are open or closed! Operating smoothly with just one hand, the screen stays in any position across the doorway without snapping shut, allowing for an easy transition from inside to out.

Should the screen mesh blow out of the top or bottom track, it will feed back onto the roll the next time it is retracted.

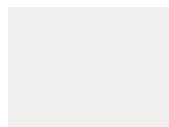

Considered design

The S2 Screen can be paired with French or sliding doors, and with many styles of windows. Clever design allows it to be installed on either the inside or outside of the opening depending on your requirements.

Once in place, the screen mechanism is accessible through the removable covers for cleaning or servicing.

Materials and finishes

The durable aluminium frame is available powder-coated in RAL 9016 Traffic White or RAL 7016 Anthracite Grey. Custom colours are available on request.

RAL 9016

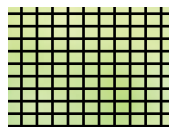

RAL 7016

Custom on request

The charcoal insect mesh is made from hard-wearing polyester/PVC and is available in Standard weave (for flies, moths and other pests) or Tight weave (for tiny insects).

Standard weave

Tight weave

Keep your home insect free without the need to reach for chemicals and sprays

Enjoy uninterrupted views with retractable screens that are pleat-free

With the touch of a fingertip your youngest family members can move the screens aside

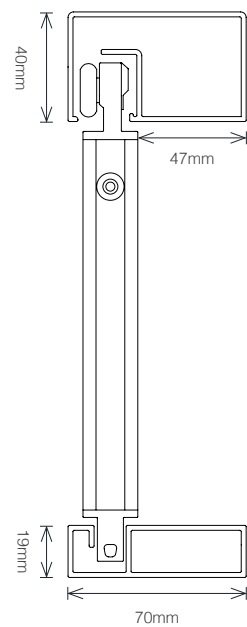

Removable covers make cleaning simple so your screens continue to work like new

Product detail

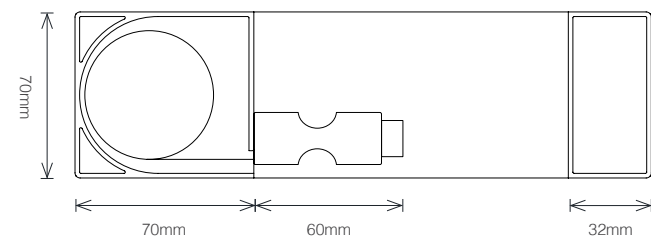

Thanks to its compact design S2 is easily paired with a new door, either during a renovation, extension or new build, or can be retrofitted to an existing door.

Single screen
