

Elevate your lifestyle with **RETRACTABLE SCREENS & SHADES**

There's no denying bi-folds and other large doors transform your home. How else can you achieve such luxurious open plan living that lets you connect seamlessly with the outdoors?

When planning a renovation or new build it's easy to be distracted organizing your beautiful bi-folds or sliding doors — but what will you do when you need a little privacy? How will you manage sun glare or control insects?

Centor's award-winning S4 Screen & Shade System — with retractable insect screens and shades — takes care of that for you. Our unique products are built into the wall, meaning screens and shades are there when needed and hidden when not.

Specifically designed for large doors, S4 can span 126" (3200mm) high and 354 13/16" (9013mm) wide¹.

Don't let busy curtains or screens spoil your view!

Traditional curtains crowd your doorway while pleated screens detract from your view outside.

Screens & shades retract into the frame meaning they're available when needed and hidden when not.

Retractable shades let you control sunlight, glare and privacy — with light-filtering and full blackout options.

Insect screens help you manage insects while allowing breezes into your home — reducing the need for cooling.

CONSIDERED DESIGN

Finger-tip operation
Engineered to glide from any height

Unobtrusive
Screens are there when needed & hidden when not

“

...my screens and shades move so elegantly and make entertaining a breeze.

ENGINEERED LUXURY

- Fabrics are fully retained within the frame — with no gaps — to allow total control of insects, sunlight and privacy.
- Screen and shade fabrics are held securely in place by top and bottom tabs, preventing screen blow-out — even in a breeze.
- Sill cover is quick and easy to remove to make cleaning trouble free.
- The system can be fitted to the inside or the outside of the opening.

FABRIC RANGE

Standard weave

Openness: 46%

Tight weave

Openness: 37%

ALUMINUM FRAME

Aluminum frame S4 is constructed from durable aluminum. The frame can be painted in one of our popular colors (centor.com/us/screens) or customized to color match existing doors and windows².

¹ Maximum measurements vary depending on your fabric selection as fabric widths are established by fabric thickness. Your consultant will be able to help you select a fabric based on your specifications. Variations in fabric thickness may mean the maximum width can not be achieved. In these cases we offer an alternative color or fabric type or an extended lead time to allow fabric to be resupplied from the mill. ² Additional fee applies
