Inside-Outside Living

Double your  
Doorway

# centor®

Centor F3 hardware (End carrier)

## Unique upgrade opportunity for OEM Patio Door Manufacturers

Window and Door Fabricators partnering with Centor will have the opportunity to enhance their product line by adding a Replacement Folding Door, potentially utilizing existing sash profiles. The addition of a Replacement Folding Door will cater to a popular and growing niche market, increase margins, and secure more sales.

Thanks to the Centor frame and hardware system, this Replacement Folding Door can be seamlessly promoted for the same openings that a traditional replacement slider would occupy. No special construction considerations are required.

Now, Window and Door Fabricators can offer their dealers and end consumers the lifestyle that a Folding Door provides.

### Benefits include

- Inside-outside living
- Reliable quality
- Fingertip operation
- Screen option available
