## **S2 | S4 Screen for Sliding Doors**

Screen Only the Opening

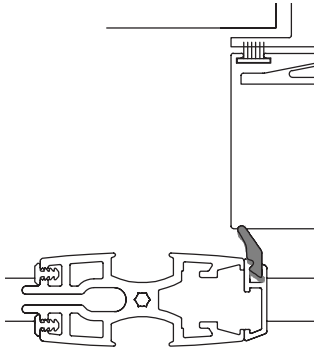

centor®

centor

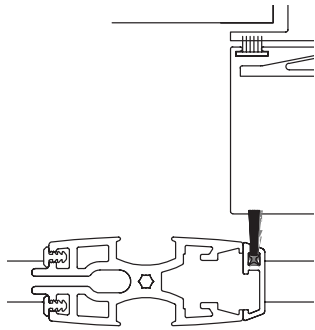

Combine Centor's Insect Screen with your sliding door to screen only the opening, preserving your view while offering seamless access to the outdoors.

Centor screens were originally designed for bi-fold doors to cover the entire door opening from jamb to jamb. With this new solution for sliding and multi-sliding doors, it now makes it easier for the insect screen to only cover the opening, providing clearer sightlines and enhancing the user experience.

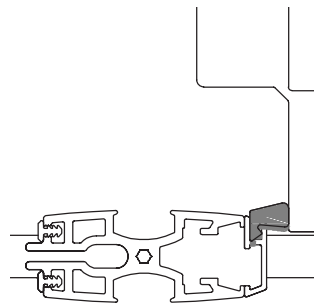

The new screen stile cover, fitted with the appropriate seal, bridges the gap between the screen stile and the sliding door panel or mullion, ensuring a flush, secure fit that prevents any gaps for insects to enter.

Side Q-Lon Seal (QL7066)

Side Brush Seal (SEL-042)

Off-Center Front Seal (AQ109)

## FEATURES

- **Aluminum Cover:**
  - Painted or anodized to perfectly match the stile finish.
  - Strong and durable for long-lasting performance.
- **Plastic Attachment Clips:**
  - Securely fastened and won't fall off.
  - Easily removable for servicing the cable spring mechanism.
- **Seal Options:**

The cover can be fitted with any seal designed to fit in a kerf groove. Three options are available and more can be added to suit specific door geometry.

  - **Q-Lon Foam Seal QQ7066:** Suitable for an 8mm gap, offering a clean, durable look.
  - **16mm Brush Seal SEL-042:** Suitable for an 8mm gap, providing softer engagement and a greater range of gap coverage.
  - **Q-Lon Foam Seal AQ109:** Ideal for small overlaps with the door, ensuring a tight seal.

## BENEFITS

- **Better user experience:** The screen aligns with the door opening, eliminating the need to reach the far end of the door frame.
- **Unobstructed views:** The insect screen does not cover the fixed glass, maintaining clear sightlines.
- **Accommodates larger doors:** With a maximum extension of 4.6m, the screen only covers the functional opening, not the entire frame.

## ORDERING

- Available for selection in CPS upon request.
- XO, Jambless and Corner XO-OX screen configurations only
- When quoting:
  - Choice of stile cover – supported with graphics
  - If the current magnet cover is requested then the magnet adaptor selection options appear in the same manner as now.
  - If the new cover with side seal is requested then the seal selection options appear.

## DESIGN SERVICE

We are here to help.

Provide DXF or DWG files of your door's front and top views. Our design team will combine our screen with your door and present the available options to suit your requirements.
