10 YEAR

Lock components and stainless handles

5 YEAR

Zinc diecast handles

Lockable from inside and out

Keyway outside, thumb turn inside for secure access

Ideal for even and two panel bifolds

2L2R and bifolds now offer egress and ingress

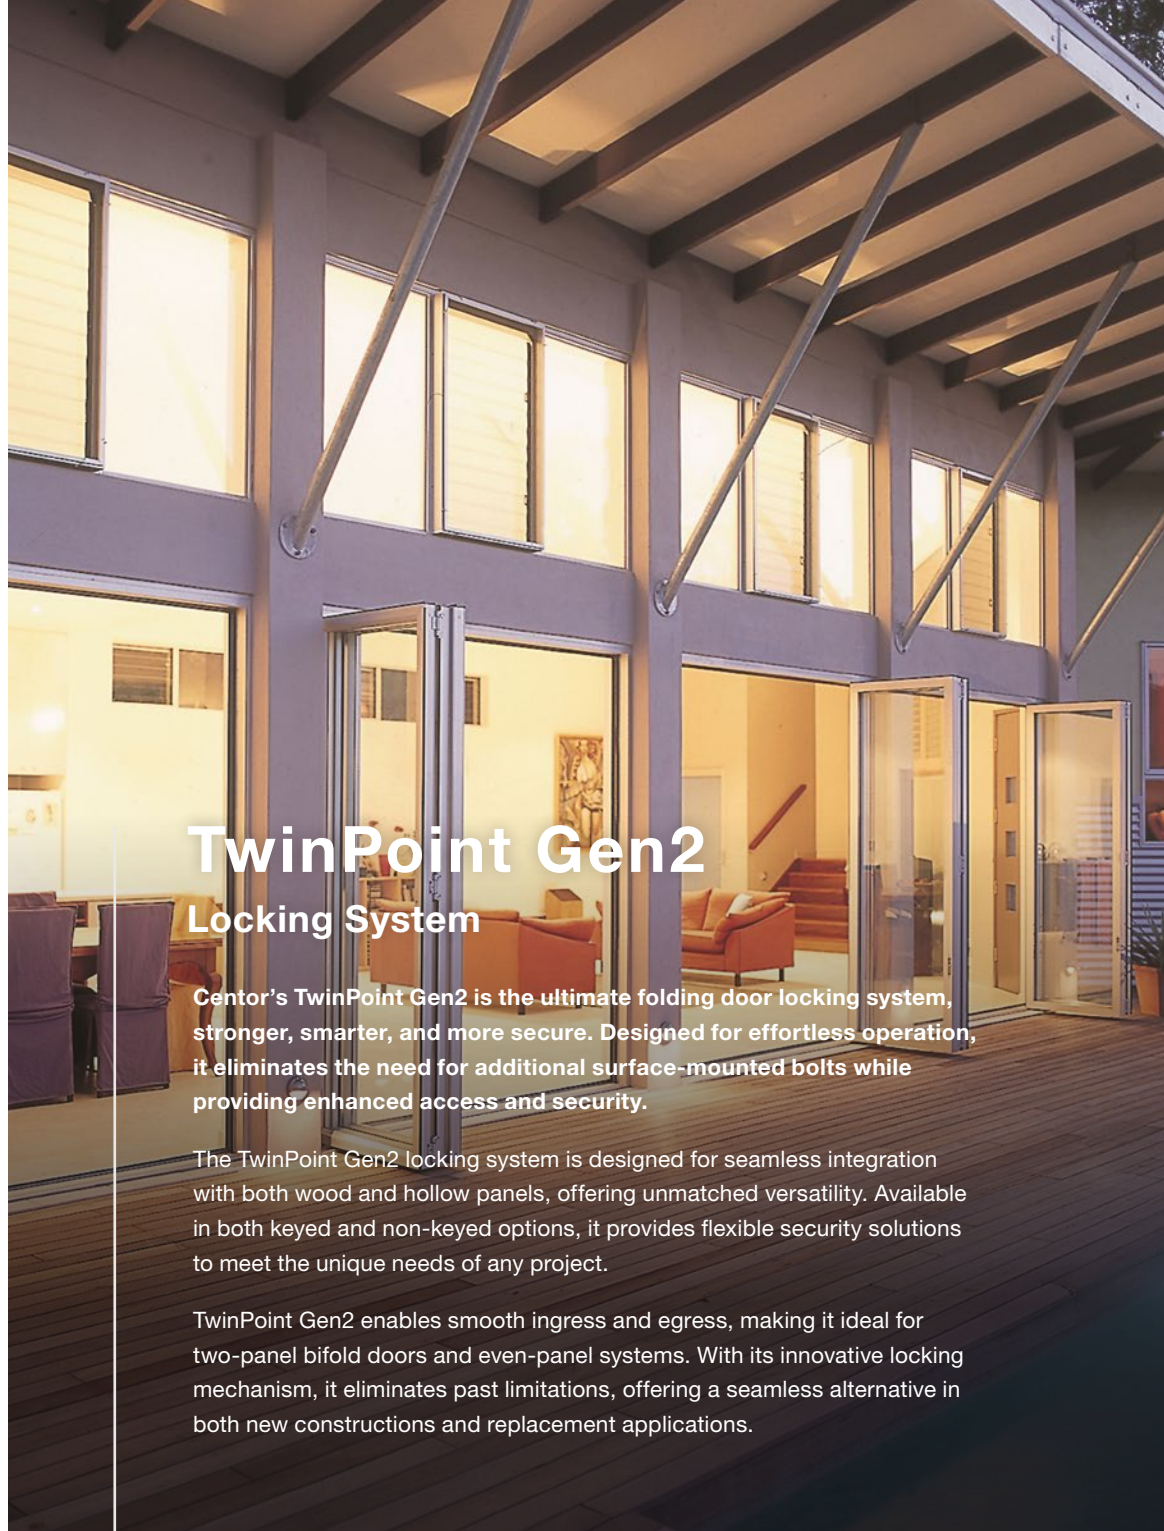

Compact gearbox for compatibility

Smaller gearbox makes lock universally compatible

Trusted Partner

Design support seamlessly integrates the TwinPoint Gen2 into your door systems

TwinPoint Gen2 Locking System

Centor's TwinPoint Gen2 is the ultimate folding door locking system, stronger, smarter, and more secure. Designed for effortless operation, it eliminates the need for additional surface-mounted bolts while providing enhanced access and security.

The TwinPoint Gen2 locking system is designed for seamless integration with both wood and hollow panels, offering unmatched versatility. Available in both keyed and non-keyed options, it provides flexible security solutions to meet the unique needs of any project.

TwinPoint Gen2 enables smooth ingress and egress, making it ideal for two-panel bifold doors and even-panel systems. With its innovative locking mechanism, it eliminates past limitations, offering a seamless alternative in both new constructions and replacement applications.

FEATURES & BENEFITS

- **Secure Exterior Access** – Lock and unlock from the outside with a keyway, eliminating the need for separate entrance hardware.
- **Compact Gearbox** – Designed to fit seamlessly into slim hollow stiles, ensuring maximum compatibility.
- **No Extra D-Handle Needed** – Strong internal handle allows users to pull doors shut with ease.
- **Seamless Aesthetic** – Handle design matches folding door handles for a uniform look.

TwinPoint Gen2

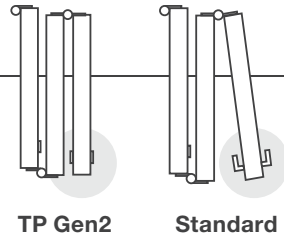

Locking System

Centor has been pioneering folding door solutions for over 70 years, setting the industry benchmark for security, durability, and elegance.

As the original inventor of exterior folding doors, our expertise ensures that every TwinPoint Gen2 lock is designed for seamless integration and maximum reliability.

NEAT PANEL STACK

Eliminates bulky entrance handles, ensuring a clean, streamlined, and elegant door profile that enhances the overall appeal.

ENGINEERED FOR STRENGTH

- Enhanced Security & Wind Resistance – The 1” bolt throw ensures superior structural performance, protecting against high winds and unauthorized entry.
- Flexible bolt options allow for various hollow panel configurations, seamlessly integrating with existing sill or head grooves.
- Reinforced Handles – Built tough to withstand years of use.

HANDLES

- Stainless-steel handles are the ultimate choice. They are suitable for all applications and will withstand the rigors of full outdoor exposure including coastal. Available in PVD black, and brushed stainless.
- Zinc die-cast handles are a cost-effective choice for indoor use and protected outdoor areas like balconies or patios, featuring a short swivel radius ideal for thin stiles. Available in back matt powdercoat, white matt powdercoat, & nickel plated.

**Minimal
protrusion**

CENTOR ADVANTAGE

Centor supports you throughout the design and production process:

- Expert Design Support – Our specialists help integrate TwinPoint Gen2 into your door systems.
- Custom Packaging – Available in bulk or kits for production flow.
- Tailored Solutions – Special components for unique requirements.
- Comprehensive Documentation – Technical guides, catalogs, 2D drawings, and 3D models are readily available on our website.

TwinPoint Gen2

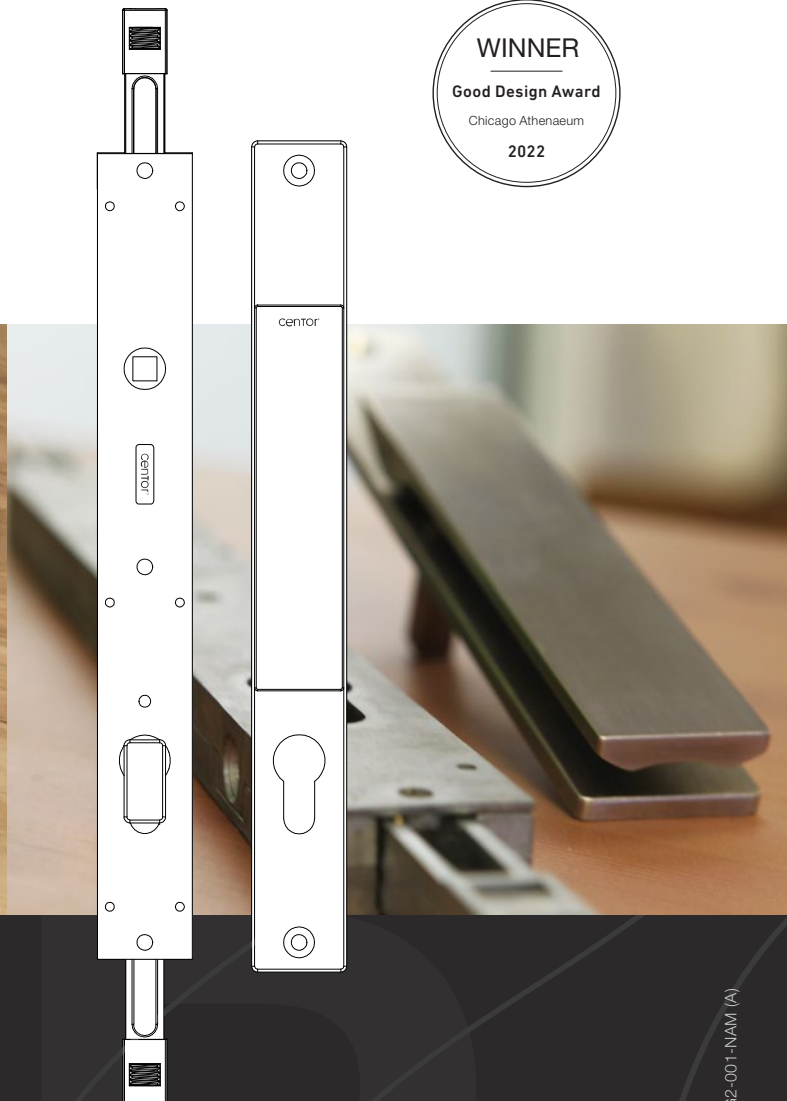

Locking System

KEYED & NON-KEYED

The TwinPoint Gen2 can be accessed from the outside, allowing it to be installed on any folding door set, including swing and even-panel configurations. The keyed version offers external key access and an internal thumb-turn. The non-keyed TwinPoint Gen2 can be used with a keyed lock or as the primary locking mechanism, offering flexibility for you and your client. Even without external access, it provides enhanced security and peace of mind.

WOOD & HOLLOW PANELS

The TwinPoint Gen2 is compatible with both wood and hollow panels. Whether aluminum, fiberglass, or PVC, Centor Design Support is able to work with all fabricators to create solutions for your needs.

COMPACT GEAR BOX

<i>Non-keyed lock body</i>	1 1/4" wide, 5/8" thick, 5 3/4" long
<i>Keyed lock body</i>	1 1/4" wide, 5/8" thick, 10 11/16" long
