Stainless steel handles - Matching H01 handles

The benefits of the new H03 stainless steel range are:

- Spindles are now supplied loose and are interchangeable.
 - The number of handle variations has been reduced. Each handle now comes with multiple spindle lengths and mounting screws to suit a range of panel thicknesses.
 - It is now easier to adapt to an unusual panel thickness. Either shorten the spindle and mounting screws supplied with the handle or use the 100mm spindle kit.
- The double handle now only uses one spindle.
 - The spindle length is simply the panel thickness less a little bit of clearance.
- Stronger internal components for long lasting smooth operation.
